HEDGEHOG

GIVE YOUR HEDGEHOG A NAME IN THE BOX BELOW

HEDGEHOG FACTFILE

-  Hedgehogs are mammals. They give birth to live babies called hoglets.
-  Hedgehogs can swim! But make sure your pond has an escape route.
-  Hedgehogs eat bugs and grubs in the wild.
-  Milk and bread makes hedgehogs poorly. Instead, feed them meaty pet food and fresh water.
-  Hedgehogs nest under hedges, brambles, log piles or in hedgehog houses. They build their nests out of moss, twigs and leaves.
-  Hedgehogs are nocturnal.

Be a hedgehog hero and call The British Hedgehog Preservation Society (01584 890801) or a local rescue centre if you see a hedgehog that you are worried about.

Nocturnal:

An animal that sleeps in the daytime and is active at night.

Extinction:

When the last animal of a species dies out, they become extinct. Once a species becomes extinct, it is gone forever.

HELP THE HEDGEHOG ESCAPE THE MAZE!

Make sure you avoid the cars, litter and bonfires that can all hurt hedgehogs.

A HEDGEHOG PLEDGE

Did you know that hedgehogs are vulnerable to extinction? Make a pledge and promise to help hedgehogs!

I pledge to help hedgehogs by:

.....

.....
